INTRODUCTION

Education Empowerment is the process that creates power in individuals over their own lives, society, and in their communities. People are empowered when they are able to access the opportunities available to them without limitations and restrictions such as in education, profession and lifestyle. Feeling entitled to make your own decisions creates a sense of empowerment. Empowerment includes the action of raising the status of women through education, raising awareness, literacy, and training. Education plays a very significant role in every one's life. It is a human right and an essential tool for achieving equality. One of the major recommendations of the National Policy on Education in 1986 is to promote Empowerment of Women through education. Empowerment is self-governance, self-sufficiency and self-maintenance. The concept of Women Empowerment was introduced at the International Women's Conference at Nairobi in 1985. Empowerment is a process which includes:

- Equal access to opportunities for using societies resources.
- Prohibition of gender disparity
- Freedom from violence
- Economic independence
- Participation in all decision making bodies.
- Freedom of choice in matters relating to one's life.

Home Science trainingrealises women their capacity to play a major role in community development. Now-a-days a leadership of women has been recognised by society also.

Home Science education deals with all aspects of home and family management. It is both an art and science. It's an 'art' because it helps you manage your resources in a skilful
manner, and it's a 'science' because it helps you improve your family life by offering you knowledge in the field.

According to Ellen Richards, the first President of Home Economic Association, “Home Economics aims at freedom of home from dominance of things and their due subordination to ideals; the simplicity in material surroundings which will free the spirit for the more important and permanent interests of the home and society, the ideal home life for today unhampered by the past.”

In very simple words Home Science can be defined as the multidisciplinary field of study that deals with health, diet, caring child, textile and garment designing, managing resources and other subjects concerned with a home.

Importance of Home Science

Home science is an integrated field of study that provides scientific and systematic knowledge about various aspects of family living.
